

Quality Assurance Manual (Products) 31.8.2015 Volume 2.7 Comforta - AQL

AQL Defect List for Service Line Comforta

Three types of defect

Critical Defect - A defect that is likely to result in a hazardous or unsafe condition for an individual or anyone around him using the product or that contravenes mandatory regulations.

Tolerance limits for defects (size, repeatability, quality, significance) will be defined later.

The appearance of a critical defect stops the production.

Major Defect – A defect that is likely to result in failure; reducing the usability of the product and obvious appearance defects affecting the sale ability or shorten the life cycle of the product.

Tolerance limits of defects (size, repeatability, quality, significance) will be defined later.

4 Major defects -> 1 critical defect -> stop the production.

Minor Defect - A defect that does not reduce the usability of the product but is nevertheless a workmanship defect beyond the defined specifications or construction requirements.

Tolerance limits for defect (size, repeatability, quality, significance) will be defined later.

Patient Wear and Bathrobe specific defect are marked with blue color at the end of the list!

4 Minor defects -> 1 Major Defect.

Defect Description	Critical	Major	Minor
Product Product not matching Approval sample, technical speci	fication or order	X	
1 Todact Not Matering Approval Sample, teermical speed	neation of order		
Material Defects - Woven materials			
Weaving Faults - (broken yarn)		Χ	
Weaving Faults – (missed yarn)		Χ	
Weaving Faults – (rough yarn)		Χ	X
Weaving Faults – (pills)		Χ	
Weaving Faults – (color stripes)		Χ	
Weaving Faults – (thick place)		Χ	
Weaving Faults – (thin place)		Χ
